Summary

Forward deployed software engineer with 5+ years of experience building scalable applications. I've led high-impact projects that improved deployment accuracy by 62% and enhanced application performance by 63% through rigorous code quality and testing practices. My work reducing bugs and strengthening system stability contributed to a 36% revenue increase and 93% on-time delivery rate across several platforms. I have published open-source packages and actively contributed to other projects, demonstrating technical leadership and community involvement. I am all about solving complex technical problems and delivering high-performance solutions that work at scale.

Skills

Spoken Languages: English (Native)
Programming Languages: TypeScript, JavaScript, HTML, CSS, SQL, Swift, Kotlin, Flutter, Java, Python
Frameworks & Libraries: React.js, React Native, Redux, MobX, Zustand, Tailwind CSS, Styled-Components, React Query, Next.js
Backend & APIs: Node.js, RESTful APIs, GraphQL, Django
Databases: MongoDB, SQL, PostgreSQL, Redis
Version Control & Tools: Git, GitHub, Slack, Notion, Google Chat, Click Up
UI/UX & Design: Figma, Framer
Infrastructure: Amazon Web Services (AWS), Google Cloud Platform (GCP), Heroku, Digital Ocean, Docker
Mobile & DevOps Tools: Firebase, OTA Tools, Google Play Console, App Store Connect (TestFlight)
Agile Practices: Scrum, Agile Methodologies
Core Competencies: Software Design, Software Engineering & Maintenance, Software Review, System Design, Agent Tool Development
Additional Skills: Code Review & Quality Assurance, Mentorship & Knowledge Sharing, Continuous Learning, Debugging, Agentic Skills

Work Experience

Benmore Technologies
Senior Software Engineer (Full Stack) - Contract *Nov 2025 – Present*

- Developed GO-180, a veteran transition platform with over 25+ modules across employment, financial, housing, insurance and more.
- Migrated the project from Heroku to AWS (VPC, RDS, Redis, S3, EC2) with zero downtime CI/CD and cutting costs by 58%.
- Created custom agent skills and orchestrated AI agents to accelerate delivery with rigorous code review and corrections to eliminate AI slop and adhere to production standards.

Lendsqr
Software Engineer (Mobile & Frontend) - Contract *Aug 2024 – Nov 2025*

- Managed, maintained and deployed 15+ mobile applications including Irorun, and Andray Finance, serving 3M+ active users across the digital lending ecosystem, with successful App Store and Google Play releases focused on compliance, performance and more
- Successfully converted SnapCash from Expo CLI to React Native CLI to implement Netcore push notifications, enhancing developer's experience and reducing development & deployment time by over 60%
- Maintained and optimized the primary lender web platform, ensuring 100% uptime for financial service providers and reduced app crashes by 40% through uniform component system architecture
- Developed a mobile configurable form package manually using React Native that allows lenders to build customizable forms to collect custom data from borrowers, streamlining loan application processes; then converted into a Flutter package using AI development agents and basic Flutter experience, delivered within 3 weeks with rigorous code review to adhere to production grade standards

Assurdly
Software Engineer (Mobile) - Contract *Dec 2024 - Mar 2025*

- Contributed to the development of the NorthQuest Financial Application, focusing on building reliable financial solutions and improving user experience by 35%
- Executed critical React Native framework upgrade, improving application stability by 60% and reducing build failures by 90%
- Completely rehauled the application's navigation system reducing drop-off rates by 36% and developed core modules including onboarding and bill payment features, achieving 98% transaction success rate for financial operations

Provenier Innovation Limited
Full Stack Mobile Software Engineer *Nov, 2023 – July, 2024*

- Led the execution of multiple high-profile projects, enhancing efficiency and quality standards, and driving a 15% revenue increase, while ensuring 96% of clients were satisfied with project outcomes.
- Engineered a cutting-edge Investor Recommendation Model System (DreamVC) alongside the team at Provenier Innovation Limited, enhancing investor matching accuracy by 40% and accelerating funding timelines by 25%.
- Developed a comprehensive Restaurant Management App (Mira – now acquired by Chowdeck) featuring pay-outs tracking, order tracking, and inventory management; streamlined operations and increased restaurant efficiency by 42%.

Education

Federal University of Technology, Akure.
B.Sc. Software Engineering - 4.65

- **Awards**: Recognition in the Ocean of Changes Competition.
- **Articles**: "Climate Change and Individual Actions" - The ClimAct Magazine Volume IV Issue I
